

HOW TO SPOT FAKE NEWS DETECTOR KIT

- What is the website address (URL)? Be careful of similar website addresses like abcnews.com.co
- Who is the author and editor? What is their previous work like?
- What are the supporting links to the article? Must come from good websites
- When was the article written? Was it created years ago and reposted?
- Are the images real? Be careful of images that were changed
- Is it an opinion, satire, a joke or a parody article/site? This can be difficult to spot at first
- Look at surrounding articles
- Scan the comments and see what people are saying
- Check the "About" page and other articles and find the keywords that point to bias
- Does it have a bad web design?
- Does it have a lot of poor spelling and grammar?
- Check at least three other sources

"DEMAND EVIDENCE AND
THINK CRITICALLY"
