CONTENTS

Sec. 2 | Research Skill

The PYP program strives to provide multiple learning opportunities that support growth. At WRCA, the PYP program continues to develop in this area by providing students with opportunities for research through proper citation of academic resources.

As stated in the **WRCA Academic Policy** (revised Feb.2021), staff and students understand the importance of personal and academic integrity. Likewise, educators continue to develop good practices in learning and assessment.

This document looks at the **PYP Units of Inquiries** that focus on the **ATL Skill** of research. A support system is needed for students to record and document the resources used. Whether it be books, databases and websites, continual teaching of documenting sources used promotes best practices of academic honesty and integrity for grades Kindergarten to grade 5.

The long-term goal is for students to comfortably know how to show where they received their research information. In addition, students will be taught to use the WRCA library website exploring the databases as well as internet browsers (Chrome, Microsoft Edge etc.) to find reputable information effectively and efficiently. The LCMS teacher librarian has provided templates that are grade appropriate for students to show their resource list.

Please see templates on the following pages.
